

Managed SD-WAN with threat monitoring and response

Industry-leading performance. Embedded security.

SD-WAN to power digital transformation

To deliver on today's digital business initiatives, you need an agile and secure platform that maximizes global scalability. Two decades ago, Masergy pioneered software-defined networking and continues to innovate solutions that deliver positive outcomes for your enterprise.

Masergy's Managed SD-WAN is unique because it's built on Masergy's network that delivers industry-leading performance with globally consistent SLAs, and provides a single portal for real-time analytics and control with unmatched network and application intelligence. Enterprise security is built in with 24/7 threat monitoring and management, and transport-agnostic access lets you mix and match any transport method or connectivity type. Plus, Masergy always gives you an unparalleled client experience.

Improve application performance

Access the cloud quickly and simply

Gain flexibility with hybrid access

Free up IT resources

“Masergy gets high marks for strong customer service, and should be evaluated by organizations requiring network services in all the major global economies.”

Gartner

Software-defined network

- A 20-year pioneer in software-defined networking
- 99+% global availability on Masergy's network
- 1600+ customers in 102 countries

Supporting a multi-cloud enterprise has never been easier. Managed SD-WAN is integrated with Masergy's software-defined network, providing the flexibility and global reliability needed to balance price, performance, and resiliency for the foreseeable future.

No more cross-referencing disconnected networks and disparate components. With a single view of application performance, monitoring and managing your entire network and communications solution is less complex.

One portal with real-time analytics and controls

- End-to-end visibility of application performance
- Real-time bandwidth controls for every location/link
- Self-service controls and full-service management too

Flexible access options

- Mix and match public and private connectivity
- Broadband procurement services or bring your own
- Masergy network SLAs are guaranteed globally

Masergy gives you the flexibility you need to align your connectivity design with your business needs. You can leverage your existing infrastructure across private, public, and wireless access points, and Masergy will work with any last-mile provider.

As your applications move to the cloud, you need agile and secure connectivity to support your digital strategy. Masergy makes it easy to rapidly establish direct connections to cloud providers and get highperforming SaaS applications with industryunique cloud SLAs.

Software-defined cloud interconnect

- Scalable and secure connectivity to leading cloud providers (AWS, Microsoft Azure, Google, and more)
- Connect to ecosystem of SaaS applications
- Cloud SLAs guarantee performance

Unparalleled customer experience

- 24/7 monitoring and live tech support
- Procurement and installation included
- Dedicated project manager

The end goal is about designing an SD-WAN solution that can deliver results without overburdening your internal IT team. As a 20-year leader in managed IT services, Masergy ensures the lowest deployment complexities and a seamless experience to free up more of your IT resources.

Built-in security: threat monitoring and response

As applications move to the cloud, remote office traffic no longer needs to be backhauled to the data center for internet access. Rather, each remote office now has its own internet “break-out” to efficiently route SaaS traffic. This creates significant challenges as hundreds of security appliances now need to be monitored and managed consistently for security purposes. With limited budgets and resources, many IT leaders struggle with continuous security monitoring and threat response. Managed SD-WAN from Masergy solves this problem.

Masergy uniquely combines Managed SD-WAN with Managed Security Services for a turnkey solution that enables security best practices with 24/7 Threat Monitoring and Response that’s affordable for any organization.

Key features

- Enforces consistent security policy across all SD-WAN devices
- Tracks security incidents requiring your immediate attention
- Delivers security alert metrics in the Managed SD-WAN portal

Managed SD-WAN security service options

Product comparison matrix	Unified threat management	Threat monitoring and response	Managed security services
Logging & alerting	✓	✓	✓
24x7 monitoring		✓	✓
Incident response		✓	✓
Firewall integration		✓	✓
Network behavior analytics			✓
Advanced IDS			✓
Network visibility tool			✓
Threat intelligence			✓
3rd party tool integration*			✓

* Options for integrating best-of-breed security tools, such as Cloud Workload Protection, Endpoint Detection & Response, CASB, and Security Monitoring for Office365, into your multi-cloud environment

Your Security Options

Unified Threat Management is a built-in capability that integrates a range of security features including firewall, anti-virus, and intrusion detection and prevention capabilities into a single platform.

Bundle your SD-WAN solution with **Threat Monitoring and Response** or the **Managed Security Services** and you’ll get a fully managed service that monitors alerting from the Fortinet® Unified Threat Management appliance, which is deployed without any additional customer premise equipment. Masergy’s tenured analysts triage alerts in real-time, 24/7, making assessments and taking any needed response on your team’s behalf.

Select **Managed Security Services** and you’ll receive a comprehensive strategy that incorporates network behavioral analytics, visibility tools, and threat intelligence to further accelerate risk mitigation. Want to expand coverage to your entire IT environment? This industry-leading service can also span your cloud environments, internal networks, and endpoints.

Why Masergy

Recognized as the pioneer in software-defined networking, Masergy enables unrivaled application performance across the network and the cloud with Managed SD-WAN, UCaaS, CCaaS, and Managed Security solutions.

3 year

visionary in Gartner Magic Quadrant for Network Services, Global

100%

in-sequence packet delivery **guarantee** on Masergy's network

99%

customer **retention** rate

1600+

enterprise customers across **102** countries

ingenico

Challenge

Build a network capable of supporting a growth plan to double the size of the company

Results

- 40% cost savings
- 30% more bandwidth

“With Masergy Managed SD-WAN, we have lowered our total cost of operations.”

CIO, Ingenico Group

Pearl Meyer

Challenge

Improve cloud migration, cybersecurity, and disaster recovery while freeing IT resources

Results

- 15% cost savings
- More IT resources

“Masergy’s Managed SD-WAN enabled Pearl Meyer to free IT resources, increase our network performance, and lower our IT costs.”
