## Packet Fusion Offers Zoom Video Communications' Unified Communication Platform for Video Meetings and Voice

Offering enables businesses to provide work-from-home options and to gain long-term productivity benefits

Packet Fusion announced today that they will be offering Zoom Video Communications' unified communication platform for video meetings and voice. The offering comes at a time when more businesses are looking to provide work-from-home options. Zoom also delivers long-term productivity benefits through their cloud-based phone, software-based conference room solutions, and a variety of subscription plans for video webinars and events.

"With the Covid-19 virus on people's minds, businesses are rethinking how they collaborate and meet, because face-to-face isn't always practical—or even advisable these days," said Packet Fusion CEO Matt Pingatore. "We're seeing companies who hadn't developed strategies for connecting a remote workforce, now rapidly moving in that direction."

Pingatore stresses that the benefits are not just short-term. "Contrary to popular sentiment, voice isn't dead. It's being consumed differently, and collaboration solutions are where the conversations are happening. Zoom is a cost-effective way to enable dispersed teams to work together seamlessly, and it's designed with a mobile workforce in mind."

If you would like to know how Zoom can work for your business, contact [mpingatore@packetfusion.com](mailto:mpingatore@packetfusion.com)

The banner features the PacketFusion logo on the left. To its right, the text reads "Helping you see clearly in 2020" and "A Series of Lunch &amp; Learn Webinars". In the center, there is an illustration of two hands shaking. On the right side, a green box contains the text "March 25, noon PST", "How to find the right cloud solution", and "Sponsored by Mitel". Below this, a dark blue button with white text says "REGISTER TODAY" with a right-pointing arrow.

Wednesday, March 25, 12:00 Noon PST

*Lunch & Learn with Mitel*

Mitel discusses how to find the right cloud communications solution for your business.
